

# いもづる計算(2)

氏名 ( )

$$\left\{ 1\frac{1}{2} - \left( 1\frac{2}{5} \div 6.3 - \frac{1}{9} \right) \times 2\frac{1}{4} \right\} \times 16 = \boxed{\text{ア}} \quad \boxed{\text{ア}} =$$

$$40 - 3 \times \left( 25 - \text{ア} \div 5 \times 4 \right) + 12 = \boxed{\text{イ}} \quad \boxed{\text{イ}} =$$

$$\left\{ \left( 3.14 - 2.06 \right) \div 3 + 0.04 \right\} \times \text{イ} = \boxed{\text{ウ}} \quad \boxed{\text{ウ}} =$$

$$\frac{1}{2} + \left( \boxed{\text{エ}} \div 2\frac{4}{5} - 1\frac{1}{5} \right) \times 2.5 = \text{ウ} \quad \boxed{\text{エ}} =$$

$$\left( 1\frac{1}{4} - \frac{9}{\text{エ}} \right) \times \left( 3\frac{3}{4} - \frac{2}{5} \div 1\frac{3}{5} \right) = \boxed{\text{オ}} \quad \boxed{\text{オ}} =$$

# いもづる計算(2) 解答

$$\left\{ 1\frac{1}{2} - \left( \left( 1\frac{2}{5} \div 6.3 - \frac{1}{9} \right) \times 2\frac{1}{4} \right) \right\} \times 16 = \boxed{\text{ア}}$$

$$\boxed{\text{ア}} = 20$$

$$40 - 3 \times \left( 25 - \frac{\boxed{\text{イ}} \div 5 \times 4}{16} \right) + 12 = \boxed{\text{イ}}$$

$$\boxed{\text{イ}} = 25$$

$$\left\{ \left( 3.14 - 2.06 \right) \div 3 + 0.04 \right\} \times \boxed{\text{ウ}} = \boxed{\text{ウ}}$$

$$\boxed{\text{ウ}} = 10$$

$$\frac{1}{2} + \left( \left( \frac{\boxed{\text{エ}}}{5} \div 2\frac{4}{5} - 1\frac{1}{5} \right) \times 2.5 \right) = \boxed{\text{エ}}$$

$$\boxed{\text{エ}} = 14$$

$$\left( 1\frac{1}{4} - \frac{9}{\boxed{\text{オ}}} \right) \times \left( 3\frac{3}{4} - \frac{2}{5} \div 1\frac{3}{5} \right) = \boxed{\text{オ}}$$

$$\boxed{\text{オ}} = 2\frac{1}{8}$$
